SUMMARY

Experienced Frontend Web and Mobile Developer with 3 years of experience at Whaaat Studios. Proven ability to create responsive and intuitive user interfaces for web and mobile applications. Skilled in HTML, CSS, JavaScript, and various frontend frameworks. Seeking new opportunities to apply technical skills and contribute to the success of a dynamic development team.

EXPERIENCE

Frontend Web and Mobile Developer

Whaaat Studios July 2021 - May 2024, Martinique

- **Implemented** front-end logic and managed CRUD operations for mobile apps using React Native and Expo, leveraging Firebase for data management.
- **Integrated** Google Maps, push notifications, and Google/Facebook login functionalities for mobile apps, enhancing user experience.
- **Collaborated** on thorough testing of all projects to ensure a seamless user experience.
- **Utilized** Next.js, JavaScript, CSS, React, and libraries like Material UI to build dynamic and responsive web experiences.
- **Implemented web secure routes within Next.js projects** to restrict unauthorized access to sensitive data and functionalities, ensuring a robust and secure user experience.
- **Implemented mobile secure routes within Expo projects** to restrict unauthorized access to sensitive data and functionalities, ensuring a robust and secure user experience.
- **Engineered** a responsive mobile-first user interface for a high-traffic e-commerce platform using JavaScript, Next.js, React.
- **Incorporated user-friendly loading indicators** to provide visual feedback during data fetching processes, enhancing user experience and reducing perceived delays.
- **Performed code refactoring** to improve code readability, maintainability, and efficiency, ensuring a well-structured and sustainable codebase for future development and modifications.
- **Developed robust field validations** to safeguard user input, prevent errors, and maintain data integrity within the application.

PROJECTS

Rdv Web (E-commerce & Appointment Booking)

WhaaatStudios • <https://dev.front.rendez-vousbeaute.com/> • October 2023 - May 2024

- Developed secure user authentication with login and implemented robust field validations for a secure e-commerce and appointment booking experience.
- Designed and built the user interface for all application pages, including landing page, product browsing, appointment scheduling, and checkout functionalities.
- Ensured a seamless user experience by implementing responsive design for optimal viewing across devices.
- Integrated APIs and managed CRUD operations for efficient data handling of products, appointments, and user information.
- Utilized Google Maps API to integrate location-based functionalities, allowing users to locate stores on the map.

Gofid Mobile App

Whaaat Studio • July 2022 - January 2024

- Developed a user-friendly mobile application using React Native and Expo, leveraging reusable components for efficient development.
- Integrated various APIs to enable core functionalities within the app.
- Implemented seamless login options using Facebook and Google authentication.
- Incorporated a "Reface" page to gamify the app and incentivize user engagement through points.
- Enhanced user experience with Google Maps integration and push notification functionalities.
- Designed responsive pages optimized for both Android and iOS devices.
- Ensured data security through field validation and implemented secure routes for user protection.

EDUCATION

8th semester

Universidad Católica Andrés Bello

- Montalban, Caracas Venezuela
- Got and advanced 90% English Level on EF SET

SKILLS

Front End: Html, css, Javascript, Next.js, React, React Native, Expo, BitBucket, Notion, Figma, Postman, TypeScript, Api integration.
